

Fourses & Datas Specifications Preparatory Degree 2018-2019

رؤية الكلية

تسعى كلية التمريض – جامعة المنصورة أن تكون إحدى أفضل كليات التمريض محلياً وإقليمياً ودولياً وأن تساهم بفاعلية في الارتقاء بالمنظومة الصحية في مصر.

رسالة الكلية

كلية التمريض – جامعة المنصورة مؤسسة تعليمية وبحثية حكومية تقدم برامج تعليمية في علوم التمريض لتقديم خريج مؤهل علميا وعمليا وإنتاج بحث علمي ودعم احتياجات المجتمع الصحية.

الأهداف الإستراتيجية للكلية

- التوسع في البنية التحتية والتجهيزات اللازمة لتحقيق التميز في كافة المجالات
- ۲. تنمیه ودعم مهارات القیادات وأعضاء هیئه التدریس ومعاونیهم والجهاز الإداري
 - ٣. تنمية الموارد الذاتية للكلية
 - ٤. تحديث آليات التقويم الذاتي بهدف التميز وتجديد الاعتماد
 - ٥. دعم العملية التعليمية لتخريج كوادر متميزة
 - ٦. تطوير برامج الدراسات العليا وجوده الأبحاث العلمية
 - ٧. تعظيم دور الكلية في مجال خدمة المجتمع وتنميه البيئة

Preparatory Master	الفرقة/المستوى:-	Biostatistics and Research Methodology احصاء حيوى و طرق بحث	اسم المقرر:	MPB1	الرمز الكودى:
2hrX16wks 2hrX16wks 64 hrs.	theoretical practical total		عدد الساعات الدراسية:	Master preparatory	التخصص:

This course aims to help postgraduate to acquire knowledge and skills related to research scientific methodology and biostatistics and help them to design a research project and write up a complete research protocol.	٢ ـ هدف المقرر
By the end of this course the candidate will be able to: مقرر	٣- المستهدف من تدريس ال
A.1-Define research methodology. A.2-Identify the importance of research in nursing. A.3- Describe research process. A.4-Discusses the types of research design and it's application. A.5- Explain different data collection methods. A.6-Discusses the principles of research ethics. A.7- Identify types of variables and coding techniques. A.8- Recognizes sources of variation in health science data. A.9- Identify sampling types and techniques. A.10- Describe the application of various statistical analyses tests. A.11- Mention different methods of data presentation.	أـ المعلومات والمقاهيم
B1- Compare between different research designs B2- Determine a representative sample size according to research design B3-Appraise research articles	ب- المهارات الذهنية الخاصة بالمقرر

B.4-Design research proposal	
B.5-Design data collection tools	
B.6-Select the appropriate data collection tools according to the research	
design	
B.7-Select the appropriate statistical analysis according to the type of	
variables and aim of the study	
B.8- Calculate the sample size according to the available data and study design	
B.9- Select the appropriate methods of data presentation	
B.10- Reflect test of statistical significance according to the type of	
variables	
C1-write a research proposal	
C2 Use the SPSS program in applications of statistical analysis	ج- المهارات المهنية
C3- Document the results of statistical measures	ج- المهارات المهنية الخاصة بالمقرر
D.1-Utilizes the concepts of resources allocation in designing research	
proposal.	
D.2- Present a research project in a systematic manner.	د_ المهارات العامة
D.3- Review literatures effectively by using electronic scientific	
database.	
D.4- Use the are wind of statistical analysis packages.	
Part I: Research Methodology	
I. Overview about research methodeless.	
I: Overview about research methodology	
-Definition of research methodology	
- Importance of research	
II: Research process	
- Select a topic	
- Review existing research and theories that are relevant	
-Critique of scientific research paper	٤ - محتوى المقرر
- Develop a hypothesis or research question/s	
-Research project	
- Research designs:	
- Observational research designs	
a- Descriptive research design:	
- Cross- sectional study design	
- Qualitative research design	
b-Analytical research design	
- Experimental research design:	

- Quasi experimental design Unit IV: Data collection - Tools and methods of data collection - Sampling Unit V: Research Ethics Part II: Biostatistics: Unit I: Introduction to Biostatistics • Definition and purposes of biostatistics • Overview of bio- statistical design of health studies Unit II: Collecting and handling of bio-statistical data • Data collection and forms' design • Coding of data • Data entry by using statistical software (SPSS) • Descriptive biostatistics Unit III: Presentation of statistical data • Tabulation • Graphs and charts Unit IV: Biostatistics rates Unit VI: Bemography and sampling techniques Unit VI: Measures of central tendency Unit VIII: Measures of dispersion Unit VIII: Tests of significance • T- test • X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable 1- practical exam 2-written exam	- Randomized control trails	
- Tools and methods of data collection - Sampling Unit V: Research Ethics Part II: Biostatistics: Unit I: Introduction to Biostatistics • Definition and purposes of biostatistics • Overview of bio- statistical design of health studies Unit II: Collecting and handling of bio-statistical data • Data collection and forms' design • Coding of data • Data entry by using statistical software (SPSS) • Descriptive biostatistics Unit III: Presentation of statistical data • Tabulation • Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VII: Measures of central tendency Unit VIII: Measures of dispersion Unit VIII: Tests of significance • T- test • X² square Correlation (Pearson & Spearman correlation coefficient) I- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable I- practical exam	- Quasi experimental design	
- Sampling Unit V: Research Ethics Part II: Biostatistics: Unit I: Introduction to Biostatistics • Definition and purposes of biostatistics • Definition and purposes of biostatistics • Overview of bio- statistical design of health studies Unit II: Collecting and handling of bio-statistical data • Data collection and forms' design • Coding of data • Data entry by using statistical software (SPSS) • Descriptive biostatistics Unit III: Presentation of statistical data • Tabulation • Graphs and charts Unit VV: Demography and sampling techniques Unit VI: Measures of central tendency Unit VIII: Tests of significance • T- test • X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable 1- practical exam	Unit IV: Data collection	
Unit V: Research Ethics Part II: Biostatistics: Unit I: Introduction to Biostatistics Definition and purposes of biostatistics Definition and purposes of biostatistics Overview of bio- statistical design of health studies Unit II: Collecting and handling of bio-statistical data Data collection and forms' design Coding of data Data entry by using statistical software (SPSS) Descriptive biostatistics Unit III: Presentation of statistical data Tabulation Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VII: Measures of central tendency Unit VIII: Tests of significance Test Test Test Test Test Test Prayagare Correlation (Pearson & Spearman correlation coefficient) Not applicable Not applicable Practical exam	- Tools and methods of data collection	
Unit V: Research Ethics Part II: Biostatistics: Unit I: Introduction to Biostatistics Definition and purposes of biostatistics Definition and purposes of biostatistics Overview of bio- statistical design of health studies Unit II: Collecting and handling of bio-statistical data Data collection and forms' design Coding of data Data entry by using statistical software (SPSS) Descriptive biostatistics Unit III: Presentation of statistical data Tabulation Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VII: Measures of central tendency Unit VIII: Tests of significance Test Test Test Test Test Test Prayagare Correlation (Pearson & Spearman correlation coefficient) Not applicable Not applicable Practical exam	- Sampling	
Unit I: Introduction to Biostatistics Definition and purposes of biostatistics Definition and purposes of biostatistics Definition and purposes of biostatistics Deverview of bio-statistical design of health studies Unit II: Collecting and handling of bio-statistical data Data collection and forms' design Coding of data Data entry by using statistical software (SPSS) Descriptive biostatistics Unit III: Presentation of statistical data Tabulation Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VII: Measures of central tendency Unit VIII: Measures of dispersion Unit VIII: Tests of significance T- test X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable Not applicable 1- practical exam		
• Definition and purposes of biostatistics • Overview of bio- statistical design of health studies Unit II: Collecting and handling of bio-statistical data • Data collection and forms' design • Coding of data • Data entry by using statistical software (SPSS) • Descriptive biostatistics Unit III: Presentation of statistical data • Tabulation • Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VI: Measures of central tendency Unit VII: Measures of dispersion Unit VIII: Tests of significance • T- test • X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable 1- practical exam	Part II: Biostatistics:	
• Overview of bio- statistical design of health studies Unit II: Collecting and handling of bio-statistical data • Data collection and forms' design • Coding of data • Data entry by using statistical software (SPSS) • Descriptive biostatistics Unit III: Presentation of statistical data • Tabulation • Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VI: Measures of central tendency Unit VII: Measures of dispersion Unit VIII: Tests of significance • T- test • X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable 1- practical exam	Unit I: Introduction to Biostatistics	
Unit II: Collecting and handling of bio-statistical data Data collection and forms' design Coding of data Data entry by using statistical software (SPSS) Descriptive biostatistics Unit III: Presentation of statistical data Tabulation Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VII: Measures of central tendency Unit VIII: Tests of significance T- test X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable 1- practical exam	 Definition and purposes of biostatistics 	
• Data collection and forms' design • Coding of data • Data entry by using statistical software (SPSS) • Descriptive biostatistics Unit III: Presentation of statistical data • Tabulation • Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VII: Measures of central tendency Unit VIII: Tests of significance • T test • X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures • 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable 1- practical exam	 Overview of bio- statistical design of health studies 	
• Coding of data • Data entry by using statistical software (SPSS) • Descriptive biostatistics Unit III: Presentation of statistical data • Tabulation • Graphs and charts Unit V: Biostatistics rates Unit V: Demography and sampling techniques Unit VI: Measures of central tendency Unit VII: Measures of dispersion Unit VIII: Tests of significance • T- test • X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable Not applicable 1- practical exam	Unit II: Collecting and handling of bio-statistical data	
• Data entry by using statistical software (SPSS) • Descriptive biostatistics Unit III: Presentation of statistical data • Tabulation • Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VI: Measures of central tendency Unit VII: Measures of dispersion Unit VIII: Tests of significance • T- test • X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable Not applicable 1- practical exam	Data collection and forms' design	
• Descriptive biostatistics Unit III: Presentation of statistical data • Tabulation • Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VII: Measures of central tendency Unit VIII: Tests of significance • T- test • X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable 1- practical exam	• Coding of data	
• Descriptive biostatistics Unit III: Presentation of statistical data • Tabulation • Graphs and charts Unit IV: Biostatistics rates Unit V: Demography and sampling techniques Unit VII: Measures of central tendency Unit VIII: Tests of significance • T- test • X² square Correlation (Pearson & Spearman correlation coefficient) 1- Interactive Lectures 2- group discussion 3- Computer lab training 4-Project- based learning Not applicable 1- practical exam	• Data entry by using statistical software (SPSS)
