Elective Course : الفرقة/المستوى: 2018/2019	Advanced Nursing in Specialized Surgery Operating room تمريض متقدم في احد تخصصات الجراحة والعمليات(المسالك البولية والجهاز الهضمي)		الرمز الكودي: 1203	
2 credit hours	نظري عدد الهماعات الدراسية: عملي	B.Sc. in N credit hou system	التخصص:	
This course aims to provide students with knowledge and advanced skills to provide comprehensive nursing care for patients undergoing specialized surgical procedure as (urological surgery, and gastrointestinal surgery as well as nursing skills in the operating room)			2- هدف المقرر:	
By the end of the course the	candidate will be able to:	يس المقرر	3- المستهدف من تدر	
A1. Identify the common disor	ders of urinary tract and GIT			
A2. Describe the common surg	gical interventions for urinary tract and Gl	T		
A3. Explain nursing care for pa	atient undergoing to surgical procedure of	urinary		
tract and GIT			أ- المعلومات	
A4. Discuss the contribution o	f various complications and traumatic ex	posure on	والمفاهيم:	
human being health status poste	operative			
A5.Classify the basic nursing	interventions according to patients health	n problems		

تمويد مقرر درا

and type of surgery in different age group A.6.Classify nursing interventions in different postoperative conditions. A.7. Identify legal aspect of human rights, ethical concepts and principles of patient informed consent. B1. Correlate basic medical and nursing science to perform clinical decisions B2. Integrate the laboratory and assessment findings with the actual manifestations B3. Use critical thinking in solving patient problem before ,during and after surgery B4. Utilize nursing process to provide suitable nursing management for patients undergoing surgery B5. Prioritize the use of different preoperative assessment checklist B6. Selects the appropriate health indicators to be used in health history assessment B7. Integrates the results of health history, physical and laboratory test findings into a meaningful nursing diagnostic formulation C1. Perform physical examination on laboratory manikin and patients who undergoing to surgical procedure of urinary tract and GIT, using preoperative assessment sheets C2. Write complete and accurate nursing care plans for patient undergoing the surgical intervention of urinary tract and GIT C3. Provide nursing care and correct positioning for patient undergoing the surgical procedure of urinary tract and GIT C4. Implement these nursing care plans timely. C5. Write accurately the implemented nursing actions for postoperative patients, using nursing records. C6. Evaluate the implemented nursing care through improvement of patients' conditions and patient satisfactions.		
 A7. Identify legal aspect of human rights, ethical concepts and principles of patient informed consent. B1. Correlate basic medical and nursing science to perform clinical decisions B2. Integrate the laboratory and assessment findings with the actual manifestations B3. Use critical thinking in solving patient problem before ,during and after surgery B4. Utilize nursing process to provide suitable nursing management for patients undergoing surgery B5. Prioritize the use of different preoperative assessment checklist B6. Selects the appropriate health indicators to be used in health history assessment B7. Integrates the results of health history, physical and laboratory test findings into a meaningful nursing diagnostic formulation C1. Perform physical examination on laboratory manikin and patients who undergoing to surgical procedure of urinary tract and GIT, using preoperative assessment sheets C2. Write complete and accurate nursing care plans for patient undergoing the surgical intervention of urinary tract and GIT C3. Provide nursing care and correct positioning for patient undergoing the surgical procedure of urinary tract and GIT C4. Implement these nursing care plans timely. C5. Write accurately the implemented nursing actions for postoperative patients, using nursing records. C6. Evaluate the implemented nursing care through improvement of patients' 	and type of surgery in different age group	
patient informed consent. B1. Correlate basic medical and nursing science to perform clinical decisions B2. Integrate the laboratory and assessment findings with the actual manifestations B3. 	الهينة العومية تصمان جو	
C7. Implement the international and/ or national approved guidelines of different		
nursing practices in dealing with different surgeries complications		
C8.Implement the national approved standards and guidelines of infection control		
practice in the operative theater		
practice in the operative theater		
C9. Apply basic principles of different methods of health education pre and		
postoperative.		
C10.Uses the available documentation formats in different health care facilities		
and handle this documents in a way that ensure information confidentiality		
and handle this documents in a way that ensure information confidentiality		
C11.Measures accurately the effect of nursing actions on patients' response		
postoperatively.		
D1. Appreciate team work & coordinate activities related to patient care.		
D2. Communicate using available communication aids		
D3. Apply basic principles of health teaching of patient		
D4. Present information clearly with efficient time management.		
D5. Apply the principles of problem solving systematically and effectively	7. 1. 1 4	
from patient admission till discharge	د- المهارات العامة:	
E1. Apply the legal and ethical issues in (nephrology and urological &		
gastroenterology) nursing		
E2. Follow the infection control measures correctly		
E3. Keep the privacy and confidentiality of patient data		
I- Urological and Gastrointestinal nursing:		
1. Introduction to urinary surgery and GIT surgery		
2. Preoperative period :	4- محتوى المقرر:	
 Description 		
 Factor affecting client response to surgery 		

 Informed consent 	
 Preoperative checklist 	
 Psychological assessment 	
 Physical assessment 	
 Health history 	
 Preoperative teaching and pre-anesthesia medication 	
3. Intraoperative period :	
 Description 	
 Responsibility of operating nurse 	
 Anesthesia and anesthetic agent 	
 Positions of operation 	
 Termination of surgery 	
4. Postoperative period:	
 Description 	
 Assessment by the post anesthetic care unit nurse 	
 Nursing actions at this period 	
 Management of postoperative discomfort 	
 Postoperative complications
