

Mission of the Bachelor of Science in Nursing Program 2025 - 2024

Program Mission

- Graduating qualified nurses with nursing competencies enables them to provide comprehensive nursing care that meets the needs of society through scientific research and evidence-based practices.

Program Objectives

1. Develop advanced curricula aligned with international curricula.
2. Establish partnerships with local and international educational organizations to provide an effective training environment that contributes to the preparation of qualified graduates trained to provide nursing care to meet the needs of society and the labor market.
3. Provide students with the necessary nursing knowledge, skills, and attitudes to fulfill their role in society, solve patient-related problems, and contribute to their future work.
4. Enhance students' abilities to communicate effectively and professionally with colleagues, patients, the community, and members of the healthcare team.
5. Prepare nurses who adhere to the required professional ethics, believe in the values of professionalism and integrity, and are able to adapt and work as a team.
6. Raise health awareness by strengthening students' leadership roles in the community and engaging them in improving healthcare awareness and keeping pace with professional developments.
7. Prepare academic competencies and qualified personnel to practice the nursing profession.
8. Prepare qualified personnel capable of dealing with information technology and modern technologies.
